Bogotá, COL • kevingamez.kg@gmail.com • +57 3112730352 • [Github](#) • [LinkedIn](#)

Founding Engineer at a MaC Venture Capital-backed startup (2024–2026). End-to-end owner of product and platform. Relentless execution, exacting attention to detail, concise communication.

Education

Universidad de los Andes Bogotá, COL
MSc in Information Engineering May 2025
Relevant Coursework: Big Data, Recommender Systems, Business Analytics, Deep Learning, Cloud Development.

Universidad de los Andes Bogotá, COL
BSc. in Systems and Computer Engineering Dec 2023
Relevant Coursework: Systems Programming, Data Structures and Algorithms, Business Analytics, Web Development, Mobile Development.

Universidad de los Andes Bogotá, COL
Minor in Mathematics Dec 2023
Minor in Management Dec 2022

Experience

Enttor Bogotá, COL
Founding Engineer Jun 2024 – Present

- Owned the entire engineering function on a six-person team, architected, developed, and maintained the platform behind \$160K+ in 2026 revenue.
- Operated an AI-native development process: defined specs, directed LLM code generation, and gated every release through review and QA; sustained 3-day build-test-ship cycles with weekly client feedback sessions.
- Engineered an AI ad-creation platform with Figma-style layer editing (OCR, image segmentation, 30-ad batch generation) rebuilt the pipeline on GPUs, cutting generation time from 11 minutes to under 2, over 5x faster.
- Automated candidate and prospect sourcing: built browser agents screening profiles by university, employer, and founder background, plus a Slack-native AI agent managing ad operations across Meta, TikTok, and Google Ads.

Samsam Bogotá, COL
Product Engineer Feb 2024 – Mar 2025

- Developed and deployed features across multiple platforms, including shopper and merchant applications.
- Designed and implemented scalable front-end and back-end solutions using TypeScript, React Native, Next.js, Prisma, and PostgreSQL.
- Refactored core backend services, improving performance, reliability, and maintainability of the e-commerce platform.

Skills

AI: LLM agents, prompt engineering, OpenAI/Anthropic APIs, OCR, image segmentation, PyTorch.
Engineering: TypeScript, Next.js, NestJS, React Native, Python, Postgres, ETL, AWS.
